PROFILE

IT professional with a path from infrastructure supervision and end-user support, to running a tech business, leading full-stack software delivery, and consulting on systems and security. Experienced in networks and servers, web and mobile applications, APIs, stakeholder requirements, and practical solutions that improve reliability, reduce cost, and support business growth.

EXPERIENCE

- **Software Developer — Team Lead** Feb 2025 – Present

Inspire Holdings Inc. / Inspire Alliance Fund Group · Taguig City

 - Lead full-stack delivery across wallet (mobile + API gateway) and corporate web applications.
 - Build React Native (Expo) wallet features and NestJS/Express backends with JWT auth, validation, and third-party integrations.
 - Develop Next.js/TypeScript admin and corporate apps with dashboards, data exports, and stakeholder-driven enhancements.
 - Design database and real-time APIs (Prisma/PostgreSQL, Firebase, Socket.io) that improve reliability and ops productivity.
 - Containerize services with Docker/Compose (PostgreSQL, Redis) and deploy to Vercel, Google Cloud Run, and AWS.
 - Gather requirements, prioritize backlog with stakeholders, and resolve bugs/performance issues across frontend and backend.
- **IT Consultant — Part Time** Feb 2025 – Aug 2026

Federal Pioneer Development Corporation · Mandaluyong City

 - Built multi-year IT plans and budgets from infrastructure audits to guide modernization.
 - Led end-to-end implementations including Microsoft 365 migrations and CRM deployments.
 - Built an IT Asset Management admin system covering inventory, assignments, maintenance, procurement, contracts, disposals, and audit tracking.
 - Built an IT helpdesk ticketing system with role-based dashboards, real-time notifications, ticket workflows, feedback, and management analytics.
 - Delivered custom websites, apps, and software solutions tailored to client requirements.
 - Designed cybersecurity frameworks covering MFA, encryption, and disaster recovery.
 - Provided retainer support and user training to drive reliable system adoption.
